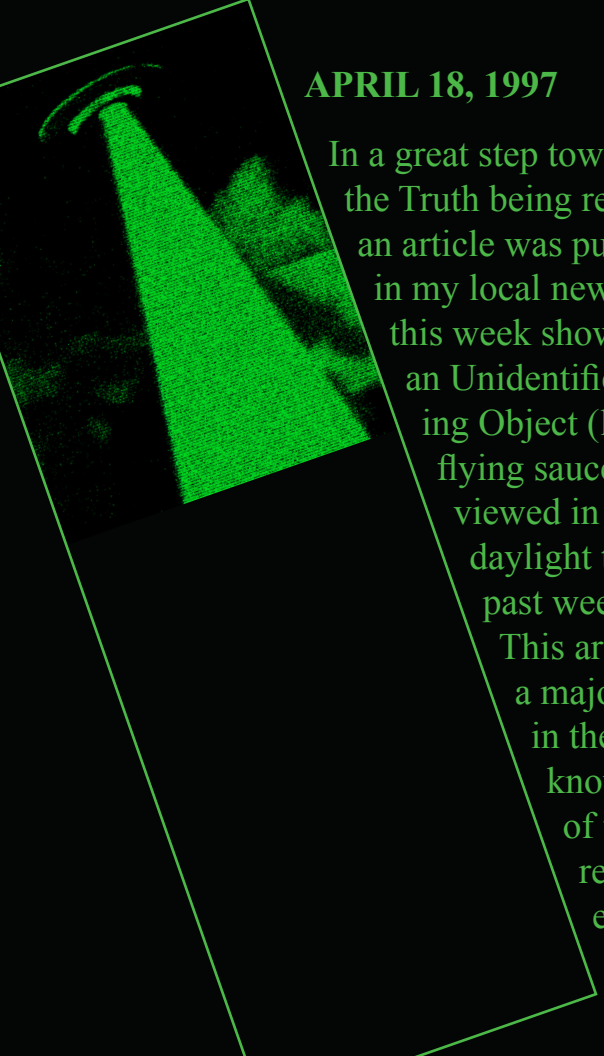
THERE IS NOTHING BEHIND THE SKY.

a web art piece.

MARCH 26, 1997

Over the past few days, I am becoming increasingly certain that I have experienced an alien encounter. I am beginning this blog as a way to document my findings as I continue to investigate these things that have been continuing to happen. First, to introduce my background, I am an extraterrestrial researcher by hobby, and a very experienced one at that. I have found numerous pieces of evidence that aliens do in fact exist and have had multiple UFO sightings thus far. I am of the belief that the extent of my investigations has driven the Extraterrestrials to take interest in me. My full recounting of the incident can be found here.

I assure you readers, that this experience will not deter me from finding the Truth in the universe as the higher beings expect that it will. Unless my life is in immediate danger, I will follow this research as far as I need to in order to uncover the secrets of the universe.



APRIL 18, 1997

In a great step towards the Truth being revealed, an article was published in my local newspaper this week showcasing an Unidentified Flying Object (likely flying saucer) viewed in broad daylight this past weekend. This article is a major win in the public knowledge of the reality of extraterrestrial life forms. It is bound to sway more towards what we extraterrestrial researchers know to be the truth.

This sighting of an object so low flying and immediately evident is no doubt a sign that more alien contact is imminent. They are making Themselves known to us, surely with big intentions. Whether for a welcome greeting or a deadly invasion is still yet to be seen. I still have yet to ascertain the temperament and ultimate objective for these beings.

The photo included in the paper was taken by yours truly.

APRIL 30, 1997

Hello friends. In light of my recent advancements in knowledge I have planned a meeting in the local library for all to attend. Together we will learn the universe's real truths and discuss findings, further research, and what we do not know as a group. As these things become more and more public, I find it urgent to share information freely and quickly in order to avoid mass panic which may have an effect on our future contact with those which live above us.

If you are local to my area I highly encourage you to attend, even if you are a skeptic.
